our SaaS AI care service puts Seniors close by

# AI Care Service

## Q. Why does my parent need Avadin-Bot?

There are many elderly people who find it difficult to use smartphones. They can't touch the small screen, and they can't read small letters.

Avadin-Bot is a good friend to elderly people who complain of depression and loneliness. Robots that interact with touch and voice recognition give them comfort.

# Anytime, Anywhere AVAdin will connect you with elderly

# AVAdin Family

Take a look at  
how your parents spent their day.

AVAdin AVAdin or AVAdin Family

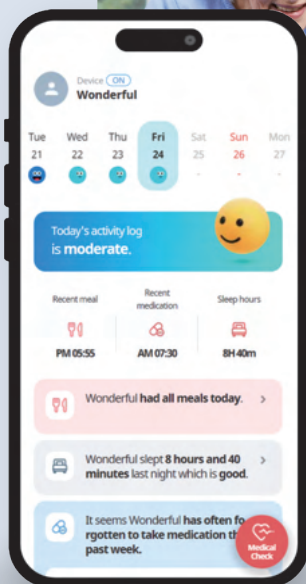

Available for iOS/Android

## Q. What can this app do for family?

Through the AVAdin Family app, you can communicate with parents and know your health status based on data analysis. AVAdin Family app helps your parents stay healthy.

AVAdin Family app is connected to the AVAdin platform, so you can easily call the caregiver.

Available for  
iOS/Android

# Core Features

## Avadin-Bot & AVAdin Friends

### 01. AI Chatbot

Seniors can speak to AVAdin, our built-in artificial intelligence, through chatbot technology.

### 02. Video Call

Caregivers and families can use video call through AVAdin. Seniors can easily use video call with voice commands or touching screen.

### 03. Service Call

Request a care service through AVAdin. Seniors can request service to their caregivers or other service agencies.

### 04. Emergency Alerts

When there are emergencies, caregivers and families can use monitoring system to check situation.

### 05. Play Songs

Play various content with voice commands. "Hi AVAdin, play some nice music."

### 06. AVAdin Talk

Chat service between AVAdin users can help prevent dementia. AVAdin will create an opportunity for seniors who are alone and simply want to talk to someone.

### 07. IoT Devices

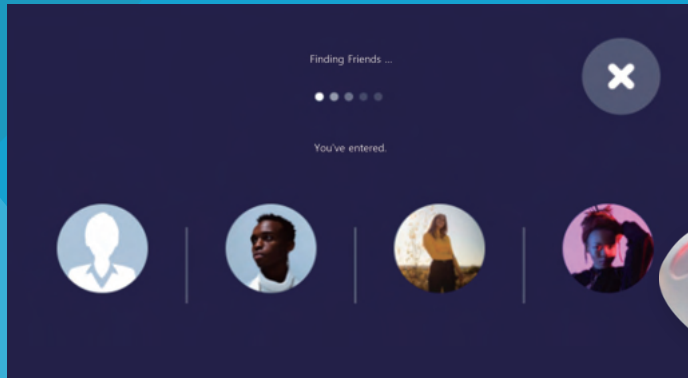

Gather health information and analytics from linkable devices. Data gathered will go to AVAdin, then to AVAdin Family app.

### 08. Medication Alarm

Notifies with an alarm to take medicine. Caregivers and families can check whether the senior took the medicine.

# AVAdinTalk

- Voice community in groups
- Choose a channel based on user's interests to participate
- Add favorite friends to the list
- Increasing social interaction in senior and prevent of dementia

## HealthCare Service

Based on various health and life log data, we ultimately seek to prevent disease and provide customized services.

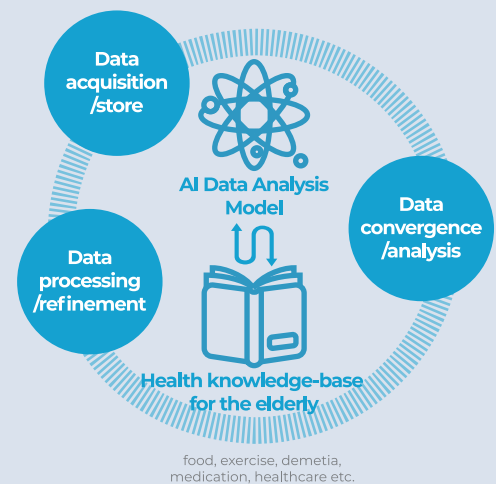

### Bigdata cluster

#### Lifelog Data

|              |           |
|--------------|-----------|
| meal         | sleep     |
| exercise     | community |
| conversation | emotion   |

#### Lifelog Data

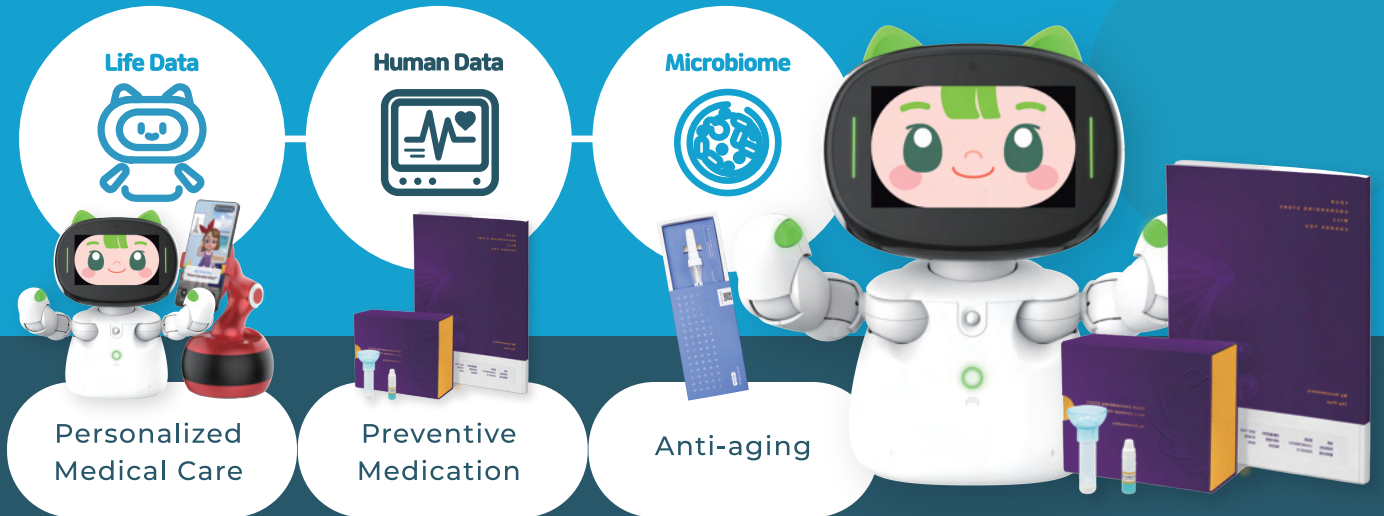

|                   |             |
|-------------------|-------------|
| blood pressure    | heartrate   |
| blood sugar       | step count  |
| oxygen satuartion | brain waves |

[Suggestion/Recommendation]  
Your heartrate is going up these days,  
so why don't you **avoid salty food** for dinner tonight?

# AVAdin Platform Roadmap

Combine lifelog data with DNA analysis  
and microbiome analysis (MOU complete)
